The Hannover International Technology Co-operation Event 2006 on Energy Technologies

Monday and Tuesday, 24th and 25th April 2006
in the context of the Hannover Industrial Fair 2006

in co-operation with:

Introduction

The Hannover International Technology Co-operation Event 2006 will take place on Monday and Tuesday, **24th and 25th of April in the context of the Hannover Industrial Fair 2006**. This event is an initiative within the IRC Network and will be organised by a group of 13 IRCs together with co-operation and event partners laying special focus on technologies in the following fields:

- ▶ Wind energy
- ▶ Fuel cells and Hydrogen technologies
- ▶ Biogas & Biomass
- ▶ Photovoltaics
- ▶ Solar thermal energy
- ▶ Geothermal energy
- ▶ Bio-fuels
- ▶ Hydropower
- ▶ Hybrid energy systems
- ▶ Rational use of energy and energy efficiency
- ▶ Energy transmission and distribution
- ▶ Energy conversion and storage

Other topics related to energy technologies

- ▶ Measurement and testing technologies
- ▶ Materials, coatings, surface treatment
- ▶ Vibration, hydraulic, acoustic engineering
- ▶ Electronics, IT and software systems
- ▶ Process optimisation, simulation, visualisation
- ▶ Meteorology
- ▶ other

The purpose of this Industrial Partnering Event is to create a meeting point for technology requests, offers and exchange. It will also be the place for you to meet other experts and companies active in the technology fields mentioned above.

About Hannover International Technology Co-operation Event

Since 2002 the Innovation Relay Centre Network organises targeted brokerage events at each Hannover Industrial Fair. In 2005, the event attracted more than 150 participants from 15 countries and almost 260 meetings were scheduled, resulting in a number of bilateral co-operations and international technology partnerships.

About the IRC Network

The Innovation Relay Centre Network (IRC) was set up in 1995 by the European Commission and supports innovation and the transfer of technology in Europe. The network involves more than 1000 people located in over 220 local contact points in 33 countries (25 EU Member States, Bulgaria, Romania, Iceland, Israel, Norway, Switzerland, Turkey and Chile) all offering special business support services to companies, research institutes, universities and technology centres.

Find out more about the Network at → www.innovationrelay.net

Target Audience

Small and medium-sized enterprises (SME) as well as **larger companies** which need and/or offer innovative technologies or tools. Developers and producers, technical consultants, **universities**, system integrators and **research institutes**. Potential partners for innovation projects.

Make tomorrow's contacts today!

Meet relevant companies and institutes, technology developers and organisations which offer, require or utilise innovative technologies throughout Europe and take advantages of their core competence. Decide in advance which companies and institutes you would like to meet. Establish cross-border contacts with European actors in the selected fields for future collaboration on research and development according to your individual objectives. Speed up and realise innovation within your business. Exchange ideas with relevant partners within the selected topics. Obtain information on trends and developments in the related fields.
